

Report for Safety 2019 - S7014

1. The speaker's knowledge of the subject:

Value		Percent	Responses
5		78.3%	65
4		20.5%	17
3		1.2%	1
			Totals: 83

Statistics

Average	4.8
StdDev	0.4

2. The caliber of the speaker's presentation skills:

Value		Percent	Responses
5		61.4%	51
4		36.1%	30
3		2.4%	2
			Totals: 83

Statistics

Average	4.6
StdDev	0.5

3. Response to questions was sufficient:

Value	Percent	Responses
5	75.9%	63
4	20.5%	17
3	3.6%	3
		Totals: 83

Statistics

Average	4.7
StdDev	0.5

4. Interest in having this speaker at another PDC:

Value	Percent	Responses
5	68.7%	57
4	22.9%	19
3	7.2%	6
2	1.2%	1
		Totals: 83

Statistics

Average	4.6
StdDev	0.7

5. Overall evaluation of session:

Value		Percent	Responses
5		71.1%	59
4		24.1%	20
3		3.6%	3
2		1.2%	1

Totals: 83

Statistics

Average	4.7
StdDev	0.6

6. Additional comments about the session or speaker?

ResponseID Response

1	Great presentation
2	Read from the slides
5	Good information!
7	Very informative. I liked the "myth buster/verifier" approach to the session.
8	Excellent review, and with some new info I can take back to revise our confined space program
9	They did an excellent job in presenting the information.
10	Great session speakers were engaging and very knowledgeable
11	Both speakers excellent. Appreciate the .ppt and forms.
13	Very good session. Brought to light some very important points.
14	Best presentation of the conference for me.

ResponseID Response

17	One of the best classes I've attended this conference. Knowledgeable and very helpful. Don't agree that 911 is not the number to know and call when there is a confined space entrapment. THAT is the number we all know and the person on the other side of that call knows exactly who to contact.
21	Great format, myths get you thinking. Liked discussions of j4
22	Excellent session, very good information.
24	Presenters were knowledgeable of the subject. Good information.
25	Very informative and kept your interest. Liked that they showed the actual standard and talking in detail about it and using real life examples.
26	One of the best sessions that I have been to over the years.
29	Good content, clearly experts on the topic, good delivery, only wish for more clarity/fewer words on slides
31	Enjoyed this class. It was informational and reaffirmed some things that my safety department is implementing.
32	Good use of real world examples to help explain the misconceptions
33	Great informative session. Presentation flowed and was easy to understand. The information provided kept the audience engaged. Speakers knew the subject and were able to answer questions.
34	This is how the 'untangling new crane standards' should have been. Well thought out and presented. It was not a 101 class, perfect. Good real life scenarios. Both speakers did a great job and demonstrated knowledge of the subject matter. I'd attend future topics presented by either of the presenters.
36	Presentation had the information I was looking for.
37	Very informative and the presenters were great.
39	Time management needs to improve
41	Very informative
44	Very informative.
46	Very useful presentation.
48	Very informative
49	Very knowledgeable of subject

ResponseID Response

50	The speaker was very knowledgeable on the subject matter and it was a good session.
56	Great topic, could have used another 30-60 mins.
58	Bryan Haywood seems incredibly knowledgeable on this subject and has the field experience to back up his technical knowledge. Jonathan Zimmerman also brought great insight of best practices to the table.
66	good theme. really laid out the major issues with confined spaces and gave the correct work process. Speakers are SMEs and had constructive answers to questions.
68	They did a great job and gave us some great information.
72	Very practical in his approach. It wasn't just an OSHA presentation but a real world application.
73	One speaker was great the other not so much.
74	Probably the best session I attended!
76	Both speakers were very knowledgeable in the subject. Worked great with the audience. While I have incorporated the practice of lowering the LEL and compressing the oxygen to 20 to 22 I have not heard in a presentation. Great ideas to consider. Gave people something to take back with them when they return to work.
79	First speaker was not helpful, but the second speaker was very much so. They also had a few details that were incorrect. Overall a great discussion, but lose the first guy.
81	This is a very good session
82	Strong efforts to reclassify
